FOR IMMEDIATE RELEASE

Dubai, 14th May 2014

World's first globally compliant modules

Specialist Services launches the new G4 Series, their new cutting edge globally compliant modular units

Dubai, 14th May 2014 – Specialist Services launches their new globally compliant modular units – the G4 Series. These new cutting edge modules provide significant improvements to performance, but more importantly the G4 Global is the only module with worldwide approvals from major certifying bodies.

Specialist Services G4 modules are the latest in the series of market leading modular units. The G4 Series offers significant advantages in ergonomics, reliability and certification. Two years of research have culminated in specifications that allow for a unique unit certified to operate in all geomarkets. In addition significant design changes ensure that safety, reliability and long term operational costs are reduced for end users.

New developments in Specialist Services operational systems have been put through extensive testing and have only been implemented if providing significant improvements to performance. For instance, solid state flow monitors cut out calibration requirements and new HVAC systems allow for diagnostic testing, while adding operational reliability and the new ergonomics improve the feel of the module whilst reducing the need for operator interaction.

Within the G4 Series, the new G4 Global is on the cutting edge of global certification requirements providing all the advantages of the G4 but with worldwide approvals from all major certifying bodies. Currently this is the only module to have the four major certifications in one package: DNV 2.7-2 to comply with most oil companies own standards, ATEX to comply with European law, IECEx for all other areas outside the United States jurisdiction and ABS / USCG to NFPA 476 for all North American waters. For the first time a multi-national company can manage a global fleet of modules that will not be restricted to a region and can be moved to meet demands when it is required.

The standard G4 and G4 Global modules are available for both sale and hire and can be outfitted and modified to perform any number of functions to suit clients' specific project requirements. Specialist Services ability to provide an overall solution for modular units on a sale and/or hire basis provides a unique solution that ensures optimum commercial and operational parameters can be met.

Editor's notes

Specialist Services Group

Specialist Services Group is a global supplier of modular buildings and packaging solutions for people and equipment in the oil and gas industry. Established in 1982 and with head office in Dubai, the company has developed an international capability in design, engineering, manufacture, installation and support across a broad range of products and services. Over the last 30 years Specialist Services Group has developed into a highly resourced, responsive global company with international facilities in Dubai, Abu Dhabi, Aberdeen and Singapore, from where they are able to support clients' requirements worldwide.
